FAMILY MACHINE.—No other family Sewing Machine has so rapidly won favor in the household. The very large sakes of that popular machine, as shown by official returns, far exceed those of any other company, and this factor result has been owned that has been owned that has been owned the popular street, and the popular machine, as the popular Jewelry Store of John progress rapidly enough in such mathematically enough in such out of order, has capacity for a great range and variety of work, sewing all kinds of cloth and with all kinds of thread, and with the numerous attachments for hemming, cording, tucking, quilting, triuming, binding, raiding, a.c., and embroidering of many ingenious, tasteful and difficult designs, is the most perfect of all family sewing machines. Any one who will take the trouble to examine the merits of the different machines claiming attention, can soon discover whether we claim too much for ours. It would avail us nothing to make the above ours. It would avail us nothing to make the above assertions if we were not ready to prove them, and all we ask is a trial, for observation alone can justly convey a clear impression of the many kinds of work of which our new family machine is capable.

THE FOLDING CASES.

Which open with spacious tables to sustain the work, and which fold into tables or boxes to protect the machines, when not in use, from dust and med diesome flagers, are made from choice woods, embellished by pleasing designs, thus making our new family machine not only an ornamental piece of turniture, but in some of the more elaborately finished machines, a work of real art.

THE ATTACHMENTS of our new family machine, above referred to, are not only numerous, but highly useful for the purposes for which they were intended. They need only a trial to show their great value. Among the good trade.

EMBROIDERER:

Of the different attachments of our new family matchine which have secured the attention and approval of our customers that for embroidering, like the flemmer, is one of the few instruments which will most please and satisfy the observer of its real-value. It is so simple in attreture, that any one who can sew on our machine or nuseit, and without instruction. It may be attached to or detached from she machine in an instant. Without a lengthy description, and even then, it would be difficult to describe the great variety of work that this little in attrament will do. The reader must not suppose that what we speak of is a mere chain stitch operation, which is sometimes humarously termed embroidery. If desired, three colors of any kind of thread may be used at any one time, and the colors or thread may be used at any one time, and the colors or thread may be takened; thus as many or as few colors may be used as the operator, by removing the spools in use and putting others in their stend; thus as many or as few colors may be used as the operator wishes, in the embroidering of any garment. A great variety of results are produced by the manner in which the tensions are regulated. Different results may be produced while the machine is in motion by simply changing the tensions. Results vary according to the length of attimbes, kinds, colors and tensions of the threads. the tensions Results vary according to the length of atlinhas, kinds, colors and tensions of the threads, as well as sizes of the needles used. The Embroderer will use any kind of thread. The use of zephyr worsted for certain purposes gives very pleasing re-sults. In order to get a just idea of this valuable
